- + **Multi-Megapixel Resolution Video** - 4MP resolution allows you to capture a high level of clarity and detail for most applications.
- + **3D Digital Noise Reduction (DNR)** effectively filters noise to produce a crisper, clear video stream.
- + **Advanced Analytics with Strobe and Audible Alarm** - SmartSense analytics deliver AI powered event detection for vehicle and human detection that can activate the built-in white light strobes and a high decibel alarm when triggered.
- + **Full Frame Illumination with Smart IR** - Smart full-frame illumination technology offers several advantages over standard IR for flawless night vision, including:
 - Clearer, brighter images in low light and at night
 - Delivers a wider illumination spread
 - Unique rectangular IR LED design produces a uniformly illuminated image across the entire screen
 - Reduces overexposure at the center of the image and eliminates hot spots
 - Eliminates blooming from lights by reducing ambient light pollution
 - Reduces video noise for a clearer nighttime picture, and reduces bandwidth consumption and video storage requirements
- + **Innovative Day/Night Scene Detection** - includes a hardware sensor for smart software imaging that detects surveillance scene illumination. Designed to be water and dust-proof, this allows you to avoid unexpected costs of hardware failure.
- + **Ultra H.265 Compression** - reduce bandwidth and storage requirements. With Ultra H.265 compression technology, you can store more information using less hard drive space. Ultra H.265 also helps you minimize bandwidth requirements for high-resolution video and makes the remote viewing less demanding on the recorder.
